7 REASONS TO BUY FROM IMAGE CLUB

DEAR DESIGNER,
At Image Club you'll get the innovative tools you need to do what you do best - create exhilarating designs. So sit back and flip through our pages and experience the assortment of design ideas at your fingertips. Aside from having amazing products, Image Club gives you seven other great reasons to buy:

PRICE We custom package each order in one main warehouse. That means just-in-time inventory and no middleman expenses. You just can't beat Image Club direct prices.

FAST DELIVERY Your order leaves our warehouse the same day you call. Federal Express delivers it to you the very next business day if your order is received by 3:15 pm MST. Usually in less than 24 hours!

RELIABILITY We've been developing the best desktop publishing software since 1985 - longer than anyone else.

QUALITY We design to exacting specifications and pay more to license trade names of fonts. You get a font faithful to the original with the name you know.

SELECTION Browse through our store (this catalog). If there is an image or font you need, you'll find it here.

CONVENIENCE Find what you want in the catalog, call your customer service representative toll free and pay with the credit card of your choice.

OUR 30 DAY NO RISK GUARANTEE
Every Image Club product you buy is fully guaranteed. If you are not satisfied, simply contact us for an exchange, credit or refund.

We hope that you enjoy our catalog!
Thanks for giving us a try!

BARKGROUNDS
PHOTOGEAR 12 - *30 images*
$79.99

Natural art. It's everywhere; on the ground, in the sky, and in the trees. But we rarely notice it. A skilled photographer, though, sees it and captures it for us. With Barkgrounds, photographer Jim Wehtje gives us instant access to some of the most compelling background textures nature can provide! From the subtle, muted and rich tones of spruce bark on a cloudy day through to the bold contrast of birch bark at sunrise, Barkgrounds provides you with all the natural art and inspiration you need to add a unique textural element to your designs.

OLD COUNTRY COLLAGES
PHOTOGEAR 11 - *32 images*
$79.99

This exclusive volume of backgrounds comes from internationally renowned CCC Studios, a photography studio with a history of successful photo collections. These collages carry a warm and rustic ambience and are reminiscent of a simpler and slower era. The individual objects used in each collage, from the horseshoes and building blocks through to the cameras and wooden ducks, are bound to make you look twice!
Use Country Collages whenever you want to convey comfort, warmth and a sense of North

ALL PHOTOGEAR VOLUMES INCLUDE:

- 5" x 7" RGB TIFF photos or 9" x 11.5" for background photos
- Photographs in three resolutions
- High Resolution files from 7.5 – 18 Mb

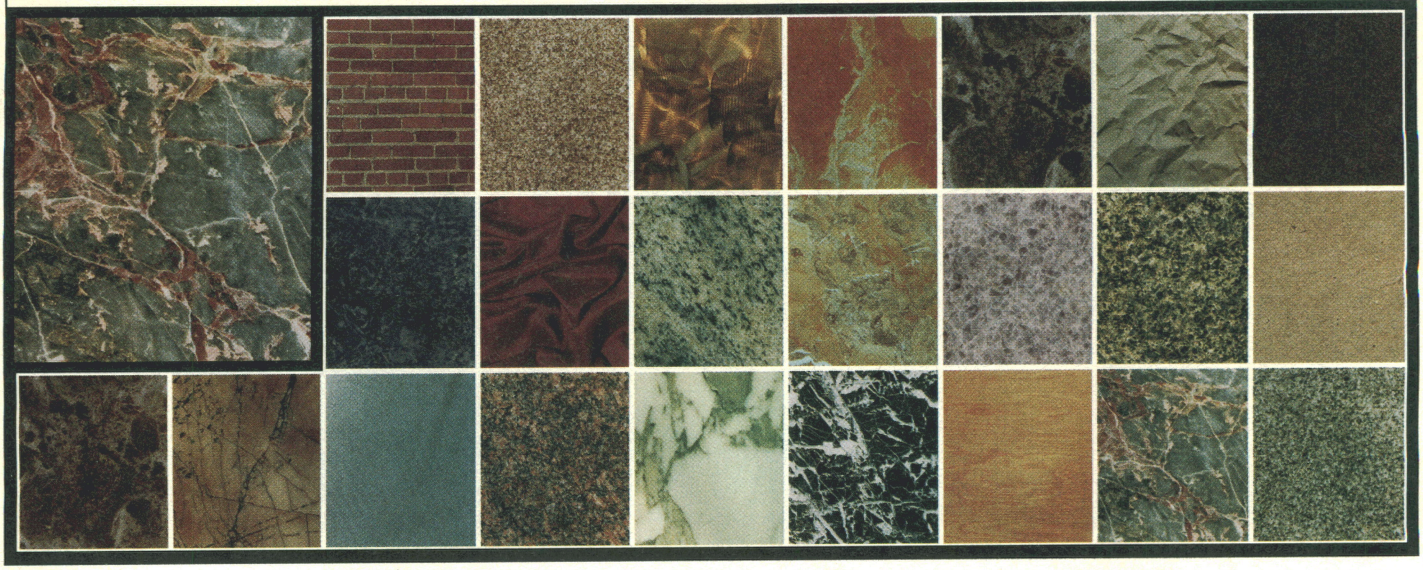
BACKGROUNDS AND TEXTURES
PHOTOGEAR 1 - *30 images*
$59.99

The best small collection of photo backgrounds and patterns anywhere. Curious about using color photographs? We recommend you start with this small collection of super high resolution full color TIFF files. All files are ready to use with your favorite page layout or photo editing applications. This carefully selected set of color photographs quickly adds the impact of a big photography budget to all your creations. Each Mac PhotoGear is organized with Adobe Fetch™ browser.



IMAGES OF BUSINESS
PHOTOGEAR 2 - *100 images*
$59.99

A comprehensive collection of stock business photos that covers all the elements of a typical working day. Begin using these stock business shots to add some real style to otherwise stuffy corporate projects. Or punctuate your presentations with a series of our images shot with similar backgrounds. You and your projects will look good staying on deadline and under budget with the Images of Business CD ROM. Adobe Fetch™ Browser is also included for the MacIntosh.

KODAK COLOR MANAGEMENT SYSTEM

Ever had a photo that looks great on screen, and then doesn't print as you expected? If so, you'll understand how important the Kodak Color Management System (KCMS) can be. KCMS takes the original image, as conceived by the photographer, and precisely matches it with your monitor and output device (e.g., SWOP coated). This assures you of crisp, vibrant and true to life colors and outstanding shadow detail every time. No need for color correction!

KCMS allows any Digital Stock image to be opened directly into CMYK, eliminating the problems that sometimes arise in an RGB to CMYK conversion. The KCMS technology, exclusive to Digital Stock, is provided free of charge on the Catalog Disc.

Go retro with Classic Photographic Image Objects (PIO). The Classic PIO library features clip photos from objects found at 20th Century Props, one of Hollywood's greatest prop houses. Every clip photo contains close-cropped PostScript clipping paths so they're background free and easy to use. Built-in alpha channels let you place transparent objects over backgrounds in Adobe Photoshop for actual "see-through" effects and every collection* contains clip photos of 20 unique objects in high and low resolution formats. Every object is shown in both 3/4 angle and straight-on perspective, allowing easy access to and manipulation of individual elements of objects such as radio dials and microphone switches. Tune in today!

AUTOMATED SPECIAL EFFECTS FOR TYPE & GRAPHICS
POWER/PAC I

This collection of 12 Auto/Effect Modules takes the technical know-how out of doing special effects in Adobe Photoshop 3.0 by automating the entire process. Auto/Effect Modules are designed to save you hours of time creating cool effects. Each module can be combined with any other module to instantly create exciting new looks!

INCLUDES

- 10,000 edge effects for type & graphics
- 350 stylized drop shadow effects
- 1000 seamless textures & patterns
- Automatic clipping path software
- Automatic selection software
- Full color manual & catalog of effects

SYSTEM REQUIREMENTS

Requires Macintosh Adobe Photoshop 3.0 with 16MB of RAM. System 7.0 or higher

1 TYPO/GRAPHIC EDGES
Makes type, logos or other graphic elements assume any of over 10,000 weathered, distressed, roughened or edged looks. Very cool!

2 AUTO/PATH
Automatically draws precise clipping or vector paths around your artwork for exporting it into your layout program or into Adobe Illustrator. Huge time saver!

3 AUTO/SHADOW
Adds any of 350 stylized, grainy or edged drop shadows to your artwork. Shadows are translucent and blend into other objects. Creates cast shadows and shadows with gradients for an ultra-realistic look.

4 AUTO/TEXTURES 1
Fuse seamless textures or patterns into your artwork, type or graphics. Includes marbles, paper, artistic patterns, organic surfaces and more!

NOW CONTAINS 12 EFFECTS MODULES

5 AUTO/TEXTURES 2
More textures! Computer generated textures, geometric patterns, organics and natural surfaces.

6 AUTO/SELECT
Removes the white background from artwork and places just the artwork on a transparent layer - selected and ready for further modifying. Even perfectly selects photos and gradients!

7 AUTO/GLOW
Adds halo and aura-like glowing effects to any artwork. Apply multicolored gradient glows and blend colors together to really add interest!

8 AUTO/EMBOSS
Raise artwork out of background colors, textures or photos and independently control the highlight, shadow, core artwork and background to explore dozens of options in very little time.

9 AUTO/RECESS
Sinks artwork into colors, textures or photos giving them the illusion of depth. Gives complete control over light direction, depth and shade.

10 AUTO/FOCUS
Auto/Focus can gradually soften areas of an image while leaving the area of focus sharper and more defined. Great for people and product shots where a selective area of focus is critical.

11 AUTO/SATURATE
Selectively desaturates the colors to create a distinction between full color and desaturated areas. Alter an image so certain areas are full color and other areas are toned back color or black and white.

12 AUTO/SCREEN
Auto/Screen can take any area of an image and create a translucent color or textured screen for dropping type or other graphics over. Can also add gradient fade-outs to the screened areas.

IMAGE CLUB FONTS ARE AN INVESTMENT IN THE EFFECTIVENESS OF YOUR COMMUNICATIONS

DigitArt

DigitArt—Image Club's own custom designed clip art with a major difference—quality! Image Club pioneered the development of EPS clip art in 1985 and still leads the way in the production of superb high quality graphics. All DigitArt images are painstakingly created in Adobe Illustrator and are presented to you in EPS format. That means they print crisply and sharply at your PostScript printer's highest resolution. It also means that the images can be easily placed into your layout with almost any page layout program. And, you can freely customize the images with virtually any vector-based illustration program, like Illustrator, FreeHand or Corel Draw. You can even rasterize the images in Photoshop and then apply your favorite special effects! DigitArt clip art—unforgettable images built to uncompromising standards!

Dear Designer,

Welcome to the new Adobe Plug-in Source, the comprehensive software catalog that brings the power of plug-ins to your workstation. Let your imagination soar above what you can already do with Adobe's applications including Photoshop, PageMaker, Illustrator, Premiere and Acrobat. Inside this catalog, you'll find the greatest selection of tools, program additions and plug-ins available for your Adobe software. These design and production solutions will heighten both your creativity and productivity and, of course, they are guaranteed to be compatible with your favorite Adobe applications.

Shop the Adobe Plug-in Source with confidence! We guarantee your complete satisfaction with every purchase. If you are not pleased with your software, let us know within 30 days and we'll exchange or refund your order. It's that simple. And best of all, you can take advantage of our many exclusive catalog offers including special catalog pricing and plug-ins that just aren't available anywhere else.

We have everything you need, all in one place. Making your job easier, that's what the Adobe Plug-in Source is all about.

Sincerely,

John Warnock, Chairman & CEO

PLUG - INS FOR ADOBE PHOTOSHOP

Andromeda Photography Filters

Series 1: The Best in Optical Lens Effects!

Mac: ANDSM001 Win: ANDSW001

$79.99

Andromeda Series 1 plug-in filters include ten of the most sought after optical lens special effects and professional level photographic techniques. Quickly and easily turn any ordinary photo into an extraordinary work of art. You'll find a number of unique or difficult to reproduce effects in this great collection, including:

- Reflection
- Prism
- Velocity
- Star

http://www.pluginsource.com/photoshop/androm1.html

Andromeda 3-D Filter

Series 2: 99% of Your Daily 3D Requirement

Mac: ANDSM002 Win: ANDSW002

$79.99

MW ★★★★

Now any Photoshop user can wrap images or text onto 3D surfaces such as spheres and cubes. Andromeda Series 2 filter fully supports Adobe Photoshop 3.0 layers and offers many features previously found only on expensive 3D rendering programs.

- "Fly around" the surface to alter your viewpoint and your object's appearance
- Movable primary white light source
- Adjustable ambient light adds depth with shading

Andromeda Screens Filter

Series 3: The Art of Converting Gray Scale to Line-Art

Mac: ANDSM003 Win: ANDSW003

$99.99

MW ★★★★★ Publish magazine ★★★★

Andromeda Series 3: Screens offers the first true digital solution for special effect Line Conversion and mezzotint screening. It's a great artistic alternative to conventional halftone dot screening. Not only will mezzotinting give you stunning effects, but you'll also get more detail and a sharper image than a similarly ruled halftone.

- Quickly and easily produce mezzotints, mezzograms, straight line screens, line patterns, mezzoblends, and specialty screens
- Convert continuous tone photographs to pure black & white patterns of various sizes (and reduce file size dramatically)
- Colorize your screened image as duotone as a cost effective alternative to four color production
- Add digital engraving techniques to your creative options.

FBI

Revolutionary Copyright Protection for Digital Images!

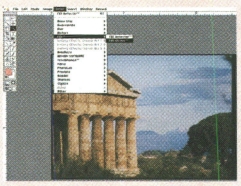
Mac: HIGHM001 Win/Win NT: HIGHW001

$394.99

Protect your digital images from unauthorized use with FBI (Fingerprinting Binary Images) software! The FBI Writer embeds an invisible fingerprint within image data that remains in place after the file has been opened, edited or copied. The FBI Detector identifies fingerprints in any image that has been encoded with the FBI Writer. It's the first major breakthrough in the fight against copyright abuse of digital images!

- Works with all continuous tone RGB, CMYK or grayscale images supported by Adobe Photoshop
- FBI fingerprints survive conversion and reconversion from numerous image formats, including JPEG and GIF
- FBI Detector is supplied as freeware (and is free to download from the World Wide Web) so it costs nothing to check images for fingerprints!
- Register your fingerprint with FBI Registry for $39

ADDING A FINGERPRINT:



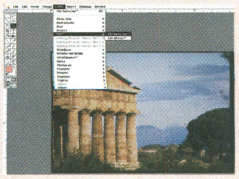
Open your photograph into Adobe Photoshop and Select FBI Writer from the Filters menu.

The FBI Writer dialog menu allows you to add a special reference number along with the fingerprint ID.

FBI Writer confirms that a fingerprint has been placed into the photograph.

DETECTING A FINGERPRINT:

Scan in the photograph you suspect has been used without your permission.



Open the scan into Adobe Photoshop. Select FBI Detector from the Filters menu.

FBI Detector will confirm that a fingerprint has been detected if this is a copy of the original file.

Highwater FBI Ltd., FBI Writer, and FBI Detector are neither endorsed by nor affiliated with the Federal Bureau of Investigation or any agency of the United States Government.

Kodak digital science™

Color Management Enhancement

State-of-the-Art Color Management Software

Why Color Management?

Desktop publishers have long been plagued by their inability to control the representation of color through the various phases of the digital production process - from input source (normally scanners or Photo CD) to monitor display to output (color printing device). Kodak's Color Management Systems (CMS) provides the best solution to this problem and can save you the wasted time and money that accompany substandard color output.

If you're a user of any application that includes Kodak CMS, such as Adobe Photoshop, PageMaker 6.0 and Micrografx Picture Publisher, you can order these Kodak CMS enhancement products and create your own beautiful, professional-quality color output.

Color Management Input Control
Input Characterization Software
$295.99
Create custom profiles for any RGB scanner or Photo CD. The best way to use scanners and Photo CD with Kodak CMS.

Color Management Output Control
CMYK Pro-Pack
$99.99
Provides six generic CMYK SWOP transforms with six different Under Color Removal (UCR) and Gray Component Removal (GCR) settings.

Color Printer Profiles Pack
$99.99
All the Profiles for most popular color printers in one pack. Match your output to input and screen colors.

Professional Proofing Profiles
$395.99 each
Profiles with 15 different UCR and GCR combinations available for most high-end proofing systems, including 3M Matchprint II, Kodak Proofing System, Fuji Color-Art and others.

Please call for availability of profiles required for your specific platform and hardware

HIGH QUALITY & LOW COST TYPEFACES BY THE HUNDREDS

Image Club has been a leading font developer since 1985. We have taken that experience and combined it with our knowledge, skill and creativity to build a professional typeface collection that anyone would love to call their own.

Image Club fonts offer you the quality, value and selection you want. Every single character in every one of our fonts is created to print smooth and clear at the highest resolution your printer can deliver. To guarantee accuracy in character shape and overall typeface quality, Image Club licenses designs directly from the foundries that developed the original face. When you order ITC Garamond, you are getting the real thing. You can also expect the same high quality when you receive one of our exclusive Image Club typeface designs.

All current fonts in the Typeface Library are supplied to you in both Adobe Type One PostScript format and TrueType format**. Whether you use a Macintosh, Power Macintosh or an IBM compatible and Microsoft Windows, Image Club gives you the font format of your choice – at no extra charge.

To stay on the edge of design, Image Club is committed to developing and releasing dozens of new brand name and original typefaces every year. So keep an eye out for exciting additions in each new Image Club Software Catalog. With over 835 fonts to choose from, the Image Club Typeface Library is one of the world's most diverse and affordable collections. Tap into the ultimate font resource today!

ROBIN WILLIAMS FONT FEATURE

Don't be a Wimp!

Robin Williams is the author of several best-selling, award winning books, including The Little Mac Book, The Mac is Not a Typewriter, Beyond The Mac is Not a Typewriter, The Non-Designer's Design Book and another popular favorite, A Blip in the Continuum, is shown below. She has also written numerous articles for various magazines and has taught traditional and electronic typography for fifteen years.

From the desk of Robin Williams:

Typography has changed. For the first time in the history of the world, type is in the hands of the masses. That's us. And look what we've done to it (she says with a wink and a smile).

You might think you would never in your life have an excuse to use a typeface like Shatterday Shred or Overprint Heavy. Ha! It's true-you've got to have guts to do it. You can't be a wimp. If you're going to use ugly typefaces at all, then use them with mucho gusto! Don't use them small and cowardly. Don't use them and hope no one notices. Be brave! Make a statement! Yes, this is an ugly typeface!

Once you get up the courage to use a misfit face, you'll be surprised at the places you can set it. Try a memo to your boss or staff. Slip one into the headline of a special feature article in your newsletter. Use one on personal or business postcards. When sending out a package, make a huge label with "To" and "From" set large in a very unusual face. Use individual distinctive letters as initial caps. Set a word large and light as a background texture. Juice up your web page with a font so ugly no one can miss it. Make stationery for your friends and children. Surprise a party invitation with at least one huge ugly character. Use them to create a very special t-shirt for your boyfriend, or to design the shirts for your daughter's soccer team. Choose a couple of special characters for an expressive logo. Oh, there is so much to do.

Remember, however, that even if the face itself is intrinsically ugly, the same ol' rules of design apply. Contrast: Choose a face that is very different from any others on the page, and increase the strength of the contrast by making it bigger, bolder, stronger. Repetition: If you use an ugly face on the front cover of your newsletter, pick up that same face in a smaller version inside, or perhaps as an occasional initial cap. Focus: There should always be one item on the page that is the primary focus-don't let two items fight for control. Ugly typefaces are so dominant that it is generally best to let them have first place. But if it's going to have first place, then let there be no doubt! Don't be a wimp!
